

BIOGRAPHICAL SKETCH

- 8 Hernandez BS, Anistas DA, de la Guzmán RJ, Fortanil II, de los Reyes VAA, Mendoza ER Independent, incidence independent and weakly reversible decompositions of chemical reaction networks *MAICH Communications in Mathematical and Computer Chemistry* **87**(2022), pp
- 9 Fairas HF, Mendoza ER, Iao AR Chemical reaction networks decompositions and realizations of S systems *Philippine Science Letters* **14**(2021) (1): pp 147– 157
- 10 Iao AR, de la Guzmán MA, Terio GJ, Sy P, Mendoza ER Stochastic Process Algebra Model of Amyloidogenic Processing in Alzheimer's Disease Chapter 18 of 'Towards intelligent systems modeling and simulation with applications to energy, epidemiology and risk assessment', Eds SA Abdul Karim, A Shafie Springer International Publishing 2021
- 11 Hernandez BS and Mendoza ER Positive equilibria of Hill-type systems *Journal of Mathematical Chemistry* **59** (2021), pp 810– 870
- 12 Fortanil II, Mendoza ER, Fortun NI A computational approach to concentration robustness in power law kinetic systems of Shinar-Fairberg type *MAICH Comm Math Comput. Chem* **86**(2021) (3): 489– 516
- 13 Magantay DM, Hernandez BS, de los Reyes A, Mendoza ER, Nicon EG A computational approach to multistationarity in poly-HI kinetic systems *MAICH Comm Math Comput. Chem* **85**(2021) (3): 605– 634
- 14 Fortun NI and Mendoza ER Absolute concentration robustness in power law kinetic systems *MAICH Comm Math Comput. Chem* **85**(2021) (3), pp 669– 691
- 15 Fairas HF, Mendoza ER, Iao AR Structural properties of an S system model of Mycobacterium tuberculosis gene regulation *Phil J Science* **149**(2020) (3), pp
- 16 Cabud RS, Batista Navano RB, Mariano VY, Mendoza ER, Yap SI Literature mining of dipterocarpaceae: Towards better its role in natural agribusiness and reforestation

- 30 Arceo CP, Jase EC, Lao AR, Mendoza ER Reactant subspaces and kinetics of chemical reaction networks *Jurnal of Math Chemistry* 56(2018) 2 395-422
- 31 Takahashi DASJ, Arceo CP, Mendoza ER Positive equilibria of a class of power law kinetics *J Math Chem* 56(2018) 2 358-394
- 32 Cortez MJ, Nazaem AN, Mendoza ER

- 53 Mendoza ER From communicational to computational: systems modeling approaches for psychiatric research. In "Systems Biology and Psychiatric Research" Tietter E, Gebide-Hinter P, Winterer G, Mendoza ER (Eds) Wiley-VCH, June 2010
- 54 Dalam Barawa B, Main Sanguino A, Mendoza ER. The evolution of synapse models from neurons to networks to spaces. *Pharmacopsychiatry* May 2010
- 55 Schwake G, Yusef S, Kühr J, Güde S, David MPC, Mendoza ER, Frey E, Röder J. Predictive modeling of non-viral gene transfer; March 2010. *Journal of Biotechnology and Bioengineering*, 105: 805-813
- 56 David MPC, Bartang J, Mendoza ER. Modeling of neuronal membrane reactions with the projective braid calculus PABM. *Electronic Proceedings in Theoretical Computer Science* (Sept 2009)
- 57 Mendoza ER. Systems Biology: Its Past, Present and Potential. *Phil Science Letters*, Vol 2, No 1 Aug 2009 (available online at <http://www.philoletters.org/>)
- 58 David MPC, Bartang J, Mendoza ER. A Projective Braid Calculus based on Activate, Bind and Mate Primitives. *Transactions on Computational Systems Biology*, Special issue on 'Computational models for cell processes', Sept 2009.
- 59 Rodriguez EM, Rudy A, del Rosario RH, Vollmar A, Mendoza ER. A Discrete Petri Net Model for Cephalostatin induced Apoptosis in Leukemic Cells. *Natural Computing* Aug 2009
- 60 del Rosario RH, Mendoza ER, Osterhoff D. Modelling the Bioenergetics of *Escherichia coli* with (Petri) Nets. *Journal of Computational and Theoretical Nanotechnology* Aug 2009
- 61 Main Sanguino A, del Rosario RH, Mendoza ER. Concept Maps and Canonical Models in Neuropsychiatry. *Pharmacopsychiatry* 2010; 75(1): 1-11

77. Mendoza BR
