Osaka University Administration Guidelines of Double Degree Ph.D. Program conducted in English with the Graduate School of Engineering	1 - 4
College of Science, De La Salle University	January 2016 Enrollment in De La Salle University, April 2017 Enrollment in Osaka University 5 - 6

1. Program Summary

The aim of the program is to equip a new generation of young scientists with fundamental knowledge and cutting-edge research skills to conduct quantum engineering design in multiple disciplines as well as advanced skills for conducting collaborative research utilizing international networks. The research in the program is conducted under the collaborative guidance of both supervisors at the home and host (Osaka) universities.

2. Important Program Features

The total period of the DDP for each student is four academic years, where a two-year exchange period in Osaka University is incorporated so that the program starts and ends

for the entrance examination. However, those who will be changing their residences to “Student” prior to enrollment may apply.

Note .

(1) An active member of the military or a civilian employed by the military cannot apply to the program.

(2) Admission will be revoked if the arrival in Japan by the designated date is impossible.

5. Selection and Announcement of Result

(1) SE-OU will select successful applicants from the pool of eligible applicants who are selected at the home university, by reviewing the application material and documents submitted, and conducting interviews .

(2) Successful applicants will be notified by post to the addresses stated in the application form by the middle of September, 2016.

6. Preliminary Screening

Applicants who fulfill the application requirements must take the Preliminary Screening prior to application. Only those who pass the Preliminary Screening can apply for the Entrance Examination. ~~or the preliminary screening~~, each applicant must submit a complete suite of documents listed below to the designated destination of the home university by the designated deadline (refer to “Destination and Deadline of Application” section for individual universities.)

	form .
--	--------

2. A Photocopy of the Applicant's Passport	On A4 size paper
--	------------------

3. Matriculation Fee and Tuition

OU waives fees for application, admission and tuition at OU. A student participating in the program shall pay the following:

College of Science (COS), De La Salle University (DLSU)

1. Time Line

Each student participating in the DDP first enrolls in COS-DLSU and studies there for at least one academic year (first home period). Subsequently, the student enrolls in

2 01 Taft Avenue Malate, 100 Manila
